

SHARWARI AKRE

Raleigh, NC (*Open to Relocation*) | +1 (919)-332-6675 | sharwari.akre@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Full Stack Software Engineer | React • Node.js • Agentic AI • Cloud-Native Architectures

EDUCATION

M.S. in Computer Science

North Carolina State University, Raleigh, NC

August 2024 – May 2026

GPA: 3.73 / 4.0

B.E. in Information Technology

Marathwada Mitra Mandal's College of Engineering, Pune, India

July 2019 – May 2023

GPA: 3.8 / 4.0

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, C++

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, D3.js

Backend & AI: Node.js, Express, FastAPI, Django, Flask, REST APIs, LangGraph, Ollama, pgvector, Whisper

Databases & Cloud: PostgreSQL, MongoDB, AWS, GCP, Docker, Kubernetes, Linux

Tools & Practices: Git, Postman, Agile/Scrum, OpenAPI/Swagger, Jira, JMeter

WORK EXPERIENCE

Product Engineering Intern | Trust2Connect

May 2025 – July 2025

- **Reduced latency by ~40%** under peak load via connection pooling; achieved **sub-200 ms notification latency** with a Pub/Sub-based communication system.
- Enabled scalable, secure document storage across 10+ microservices using **GCP Storage** and **AlloyDB (PostgreSQL)**; deployed services to a **Kubernetes**-based dev environment.
- Standardized API contracts via **Apigee**-integrated REST endpoints and **OpenAPI/Swagger** specs; engineered **React** components to surface APIs on the frontend.

Software Developer Trainee | Capgemini

December 2023 – July 2024

- Applied indexing strategies and query optimization techniques to improve SQL and PL/SQL query performance.
- Automated **UNIX-based file operations** and logging workflows, reducing error rates and manual intervention.

PROJECTS

Log Anomaly Detection - AI-Powered SOC Log Analysis | Next.js, Node.js, Express, PostgreSQL, Claude API [GitHub](#)

- Built a **two-layer AI pipeline**: deterministic regex parser pre-flags **brute force**, **SQLi**, and **path traversal** patterns; Claude API reasons over structured JSON to generate SOC narratives, anomaly confidence scores, and attack classification.
- Engineered a **per-anomaly remediation playbook** via a decoupled Claude call, cached in PostgreSQL; interactive dashboard surfaces **Top Attacking IPs**, event timeline and filterable log table with flagged row drill-down.

CodeNarrator | FastAPI, Python, Ollama, D3.js

[PyPI](#) | [GitHub](#)

- Published **codenarrator-ai** as an open-source PyPI package (**1800+ downloads**) which is an autonomous codebase agent that maps dependencies and self-directs exploration, cutting onboarding time from ~2 hours to under 5 minutes.
- Two-layer pipeline: deterministic import extraction (Python AST + regex) resolves internal edges; Qwen2.5-Coder 7B **agentic loop** explores via tool calls with breadth-first coverage; self-contained **D3.js** HTML reports.

Meeting Negotiator - Multi-Agent Scheduling | LangGraph, FastAPI, React, Google Calendar API, Ollama

[GitHub](#)

- Built a **4-agent LangGraph pipeline** delivering ~10s end-to-end scheduling; advocate agents propose slots, arbitrator runs deterministic interval-intersection on 20+ calendar slots before LLM selection.
- Integrated **Google Calendar freebusy API** with per-participant OAuth and auto event creation; 3-round negotiation loop with escalation fallback; 45 tests validated via **GitHub Actions CI**.

OPEN SOURCE CONTRIBUTIONS

- **tau2-bench #301** - Fixed class-level shared-state corruption in concurrent agentic simulations.
- **mem0 #5236** - Fixed HTTP 400 errors by correcting GPT-5 model names (gpt-5-mini, gpt-5-nano) in reasoning model whitelist.
- **mem0 #5221** - Guarded Memory.search() against blank queries crashing the embedding model.
- **potpie-ui #417** - Fixed Firebase auth crash on reload via in-memory persistence; corrected wrong parsing status endpoint.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CCP) — Amazon Web Services, 2026
